Um problem remains:

I set:

```
vzctl set 104 --devnodes mem:rw --save
```

And restarted VE, then i checked dev nodes in VE:

```
Doktor:/# ls -l /dev/mem
```

```
crwxrwxrwx 1 root news 1, 1 Apr 24 2007 /dev/mem
```

But when i try to install still get same problem:

```
apt-get --reinstall install xfonts-base
```
