Guys, is it possible to build a LiveCD with HDD support or I'm dreaming?

Anyway this is what I'm envisioning

- * Bare minimal VZ-Host as LiveCD
- * It boots in non-graphic mode
- * It should mount SWAP and VZ partition upon boot
- * It should start all active VZ-Guest
- * Since /vz is mounted on HDD, it will persist all changes
- * Important configuration for VZ-Host can be linked to /vz/etc (sysconfig, passwd, etc)
- * When new version comes out, simply replace the LiveCD and reboot!
