Dear all

I would like to announce that the new release of WebVZ 1.2 is out and available now

Now you can Migrate VPS and manage the configuration files.

<http://webvz.sourceforge.net/>

screenshots are here

<http://webvz.sourceforge.net/screenshots.html>

download page and installation instructions

<http://webvz.sourceforge.net/download.html>

I will be glad to receive your feedback at
shuaib.zahda@gmail.com

Regards
Shuaib Zahda

I would suggest you to rename VE/VPS to container (or CT for short). This is what we are doing now with wiki and vzctl/vzquota.

Thanks for the suggestion. I will do that in the next version which will be in April (God's Willing).

What is the reason for renaming it to container.
thanks

Subject: Reason for switch to "container" terminology

I think it has to do with branding.

SWsoft and Parallels joined... and now SWsoft renamed itself to Parallels... and changed their logo.

Parallels Virtuozzo Containers 4 is released and Containers is part of the name now.

Container is a better description.

It looks great. I'll try it this weekend. Do you have a plan to add enduser access and OS reinstall feature?

yes, I am going to add user access module in the next version.

What do you mean by OS reinstall feature?

Thanks

What do you mean by OS reinstall feature?

Thanks

Hope to see the next version soon.

I mean that admin and enduser can re-create VE with the same configuration.
