Hi All,

I am getting the error below from my OpenVZ Hardware Node.

Error:

Dropped packet, source wrong veid=200 src-IP=192.168.1.123 dst-IP=192.168.1.150.

The source IP is nothing more than a VPS with web apache app.

The dest IP is a dedicated NTP server I setup...

All seems to be working BUT I do get the error above. I'd appreciate any comments/suggestions on what this problem could be and how I could fix.

Joe
