Hello
i have installed apf , iptables on the HN
when i ban an ip of HN with apf -d ip and iptables -I INPUT -p tcp -s ip -j DROP

i find the ip banned from the main HNM ip which the banned ip can still access and keep flooding any VE on the other ips

please advise

I'm a noob to OpenVZ, but I think you should also block that IP from the FORWARD table:

iptables -A FORWARD -s ip -j DROP

Cheers.

hi
thanks but sadly it didn't help

Hello
your help in solving this issue is greatly important for me
thanks
