I can't use grub bootloader.

I like install ovzkernel-2.6.18-smp or fza-2.6.18-686 but get errors because post-scripts install.

How can get any solution?

Debian Etch 4.0

Using mkinitramfs-kpkg to build the ramdisk.

Could not find postinst hook script [update-grub].

Looked in: '/bin', '/sbin', '/usr/bin', '/usr/sbin'

dpkg: error al procesar linux-image-2.6.18-fza-028stab053.5-686 (--configure):

el subproceso post-installation script devolvi? el c?digo de salida de error 2

dpkg: problemas de dependencias impiden la configuraci?n de fza-2.6.18-686:

fza-2.6.18-686 depende de linux-image-2.6.18-fza-028stab053.5-686; sin embargo:

El paquete `linux-image-2.6.18-fza-028stab053.5-686' no est? configurado todav?a.

dpkg: error al procesar fza-2.6.18-686 (--configure):

problemas de dependencias - se deja sin configurar

Se encontraron errores al procesar:

linux-image-2.6.18-fza-028stab053.5-686

fza-2.6.18-686

E: Sub-process /usr/bin/dpkg returned an error code (1)

Hola,

* which bootloader is used boot a linux kernel on this server ?

* is lilo and/or grub installed ?

Please check /etc/kernel-img.conf;
update the postinst_hook and postrm_hook to update-lilo.
