Hi
Is there a quick way to pull up the load average for each VPS without having to do something like
vzctl exec 123 uptime

I tried

```
cd /vz/private  
for i in * ; do echo $i `cat /vz/root/$i/proc/loadavg` ;done
```

But that just have back the hosts load average

Thanks

rus

Hi,
I hope it helps

```
vzlist -o veid,laverage
```
