Hi!

I'm trying to compile kernel 2.6.24.
I downloaded from kernel.org (2.6.24 and not 2.6.24.3) and applied the patch.

When I compile, I get the following error:

```
cpt_process.c:865: error: 'struct task_struct' has no member named 'sysvsem'
```

Can someone help me?

tk

Mario

Apparently you have not enabled CONFIG_SYSVIPC in kernel .config. Please enable this option and try to recompile.

It works!

Tks!
