We have recently purchased a couple VPS hosts and coded a control panel. If any one has any suggestions on features to add please add them here and we will code it and eventually most likely release this panel for openvz users like us.

```
File Attachments
1) login.jpg, downloaded 877 times
2) main.jpg, downloaded 850 times
3) start-stop-restart.jpg, downloaded 784 times
4) resources.jpg, downloaded 767 times
5) change hostname.jpg, downloaded 738 times
```

Heres the rest of the screenshots.

Let the suggestions start flowing.

```
File Attachments
1) change os.jpg, downloaded 774 times
2) change root.jpg, downloaded 712 times
3) reloadvps.jpg, downloaded 683 times
4) reloadfinished.jpg, downloaded 720 times
5) accesslog.jpg, downloaded 692 times
```

We are still coding it. right now it is being tested on our VPS Client systems and more is being added every day.

Right now im looking for more functionality to add to it, then we will release it.

I would like to see a beta for download also if possible.

Together we can test it much better.

Please let us know !

It looks good enough for simple administration of VE.
If you are going to release it please add support for Debian, there isn't any web based control panel that supports Debian currently.. or at least I didn't found any.

As long as you can run apache/php/mysql on Debian it should work however it would have to be a special release based on how Debian tkaes commands via ssh

You can try webvz http://webvz.sourceforge.net . It works on debian. It will be great if we can see a demo of this tool.

Thanks

OK, this is nice to hear.

But without any (beta)release we are not able to test this.

When can we expect a release ?

Will you include Xen also in you panel later on ?

We are workign on coding an admin and a client side to this now.

For Xen, im not sure if we will develop for that or not as Xen coding is alot different that openvz.

True, but I think you can make this modulair, so that a user can only get rights on it in the DB and the rest, the backend code is seperate.

Should be doable.
