Subject: Quota accounting for another partition
Posted by GameOver on Thu, 27 Mar 2008 07:20:03 GMT

Hi,

My /vz partition is nearly full so I have to move some data to another partition. On the host system, I mount the new partition as /vz2 and then mount --bind /vz2/home2 /vz/root/$VEID/home2. Now the question is that how I can enable quota accounting for /vz/root/$VEID/home2? I'd appreciate if you guys can shed some light on this.

Many thanks

You can't.

AFAIK, vzquota is running only for one device which is mounted to /vz
