Hello,

I try to migrate a VE, but got this error, why vzmigrate still using port 22 while I already specify other port?

vzmigrate --ssh="-p 8888" -r no -v host.name.net 10
OPT:--ssh=-p 8888
OPT:-r
OPT:-v
OPT:host.name.net
Starting migration of VE 10 on host.name.net
OpenVZ is running...
   Loading /etc/vz/vz.conf and /etc/vz/conf/10.conf files
   Check IPs on destination node: xxx.xxx.xxx.xxx
Preparing remote node
   Copying config file
ssh: connect to host host.name.net port 22: Connection refused
lost connection
Error: Failed to copy config file

Best Regards,
Markus

What version of vzctl were used during this migration?
Please download the latest version from git (http://git.openvz.org/) and try
it.

Regards,
Andrey Mirkin
