Subject: NFSv4 client status Posted by ajneil on Fri, 28 Mar 2008 21:22:08 GMT View Forum Message <> Reply to Message

I wonder if someone could fill me in on the status of nfsv4 client support? I have combed the mailing list but I did not see anything specific to version4. Are there any issues with using NFSv4 client side with gcc/krb5 security in a VPS?

Thanks, Alastair.
