
Subject: [RFC][PATCH 1/4] Provide a new procfs interface to set next id
Posted by [Nadia Derby](#) on Fri, 04 Apr 2008 14:51:30 GMT
[View Forum Message](#) <> [Reply to Message](#)

[PATCH 01/04]

This patch proposes the procfs facilities needed to feed the id for the next object to be allocated.

if an
echo "LONG XX" > /proc/self/next_id
is issued, next object to be created will have XX as its id.

This applies to objects that need a single id, such as ipc objects.
