We are running 2.6.9-023stab040.1-enterprise kernel. How can we upgrade the kernel to the latest stable version?

Thanks

You can download enterprise kernel's RPM from here:
<http://wiki.openvz.org/Download/kernel/rhel4/023stab046.2>

then please use "rpm -ihv" command to install it.

thank you,
Vasily Averin

Can it be done also via yum update openvzkernel-*****

Thanks
