Hello

I use Debian sid/unstable with gcc 4.0

I have 2.6.16 with patch-026test012-combined when i compile i have error who can help with that?

```
kernel/fairsched.c: In function `fairsched_do_dump':  
kernel/fairsched.c:886: error: `PAGE_KERNEL' undeclared (first use in this function)  
kernel/fairsched.c:886: error: (Each undeclared identifier is reported only once  
kernel/fairsched.c:886: error: for each function it appears in.)  
make[2]: *** [kernel/fairsched.o] Error 1  
make[1]: *** [kernel] Error 2
```

Thanks

It's known BUG, see <http://bugzilla.openvz.org/165>

Solution is to add
`#include <asm/pgtable.h>`
to kernel/fairsched.c

Will be fixed in next kernel.
