Is there any openvz template with Java/Tomcat support?

Thanks

None that I know of. But I'll be creating one for a client this afternoon (CentOS5). We can compare notes if you like.

It's 32bit or 64bit template? Could you post the template in openvz download section? LAMP+Tomcat will be good.

Thanks

For template it doesnt matter CPU or RAM. You can put any.

Thanks

I have used Cpanel Tomcat + openvz. It works fine with 512mb but Tomcat need restart after week or so for better performance 1gb ram atleast and fully brustable CPU. But all depends on application load.

Thanks
