That is cool Veerandra. Now, for this to move forward, Suka needs to
hand over those test cases to you ;-)

Veerandra,

Have you already received those test cases from Suka ?

Subrata,

pty namespaces as such are not going to happen. We'll be pursuing
full-scale device namespaces instead.

thanks,
-serge

Oops.

device namespaces test cases are also welcome in future.

Again, either that, or tie Unix98 pty's closer into devpts (which would
have other advantages, in particular avoiding the double lookup) which
would permit the ordinary filesystem namespace mechanisms to be used.
