hello people im new with openvz but i want to learn..

i been reading the forum and i was thinking i were possible to install in a ve openfiler.It is a nas distribution and is based on centos..

what do you think?

This would be very painful, I think.

- 1) Using NFS server kernel modules in VZ is not trivial
- 2) Configuring Samba to work in VZ is not trivial
- 3) Who knows if iSCSI would be possible

Without any of those protocols, it wouldn't be too useful.

My \$.02!

Mark
