I see no offer for any source in this license file:

How can we get this resolved?

For the older vzprocps (2.0.11-6.12) Package you can find the src at:

<http://download.openvz.org/contrib/utls/>

Yes I know that but that isn't the point. The point is the src isn't there for the binary distributed. They aren't in compliance with the GPL.
