Hi,

We're installing the R1soft continuous backup agent but we're seeing:

Could not find path /lib/modules/2.6.18-53.1.13.el5.028stab053.10PAE/source/
Could not find path /lib/modules/2.6.18-53.1.13.el5.028stab053.10PAE/build/

Is there any way that we can get those headers? It's a little urgent as we need to get our backups back on track

Thanks,

Hello,

why don't you use headers from
<http://wiki.openvz.org/Download/kernel/rhel5/028stab053.10>
