Hi.

yes, you can, the kernel should work fine.

On a non-trivial configurations might happen you'll need to create initrd with additional modules (for example if you're using raid5 for / partition), but in most cases the new kernel will install fine too.

Hello there Thx you for answer i have update the ken

but is not loading

```
# grub.conf generated by anaconda
#
# Note that you do not have to rerun grub after making changes to this file
# NOTICE: You have a /boot partition. This means that
#         all kernel and initrd paths are relative to /boot/, eg.
#         root (hd0,0)
#         kernel /vmlinuz-version ro root=/dev/sda3
#         initrd /initrd-version.img
#boot=/dev/sda
default=1
timeout=5
#splashimage=(hd0,0)/grub/splash.xpm.gz
hiddenmenu
title CentOS (2.6.18-53.1.19.el5.028stab053.14PAE)
    root (hd0,0)
    kernel /vmlinuz-2.6.18-53.1.19.el5.028stab053.14PAE ro root=LABEL=/ con$
    initrd /initrd-2.6.18-53.1.19.el5.028stab053.14PAE.img
