
Subject: cannot ping internet from within VE

Posted by [thorpe](#) **on Fri, 06 Jun 2008 00:06:04 GMT**

[View Forum Message](#) <> [Reply to Message](#)

I have a few VE's setup, none of which seem to be able to reach the internet. They can all ping each other and VE0, but nothing outside.

I hope I post enough information.

/etc/vz/conf/10104.conf

```
NUMPROC="2552:2552"
AVNUMPROC="1276:1276"
NUMTCP SOCK="2552:2552"
NUMOTHERSOCK="2552:2552"
VMGUARPAGES="106535:9223372036854775807"
```

```
KMEMSIZE="104566476:115023123"
TCPSNDBUF="24402500:34855492"
TCPRCVBUF="24402500:34855492"
OTHERSOCKBUF="12201250:22654242"
DGRAMRCVBUF="12201250:12201250"
OOMGUARPAGES="106535:9223372036854775807"
PRIVVMPAGES="639210:703131"
```

```
LOCKEDPAGES="5105:5105"
SHMPAGES="63921:63921"
PHYSPAGES="0:9223372036854775807"
NUMFILE="40832:40832"
NUMFLOCK="1000:1100"
NUMPTY="255:255"
NUMSIGINFO="1024:1024"
DCACHESIZE="22834205:23519232"
NUMIPTENT="125:125"
DISKSPACE="936398:1030038"
DISKINODES="254089:279499"
CPUUNITS="17651"
VE_ROOT="/var/lib/vz/root/$VEID"
VE_PRIVATE="/var/lib/vz/private/$VEID"
OSTEMPLATE="debian-4.0-minimal"
ORIGIN_SAMPLE="my-16"
IP_ADDRESS="192.168.10.104"
HOSTNAME="etch-lab"
NAMESERVER="203.0.178.191"
SEARCHDOMAIN="thorpesystems.local"
ONBOOT="yes"
NAME="etch-lab"
```

```
/etc/sysctl.conf
kernel.printk = 4 4 1 7
net.ipv4.conf.default.proxy_arp = 0
net.ipv4.ip_forward = 1
net.ipv4.conf.all.rp_filter = 1
kernel.sysrq = 1
net.ipv4.conf.default.send_redirects = 1
net.ipv4.conf.all.send_redirects = 0
```

And my iptables rules on VE0.

Chain INPUT (policy ACCEPT)
target prot opt source destination

Chain FORWARD (policy ACCEPT)
target prot opt source destination

Chain OUTPUT (policy ACCEPT)
target prot opt source destination

Do you need more info? Where should I start?

My VE0 has no problems pinging the internet.

Hi,

it's necessary to know your network configuration:
(as I can see your VE has private IP)
if your HN has public IP look at this page
http://wiki.openvz.org/Using_NAT_for_container_with_private_IPs

Anyway, please look here
http://forum.openvz.org/index.php?t=tree&goto=27545&#msg_27545

Thank You!

My HN is actually within the same network with an ip address of 192.168.10.2

Here are a few details from the HN.

```
thorpe@oblivion ~ # sudo ifconfig
lo      Link encap:Local Loopback
        inet addr:127.0.0.1 Mask:255.0.0.0
        inet6 addr: ::1/128 Scope:Host
              UP LOOPBACK RUNNING MTU:16436 Metric:1
              RX packets:96 errors:0 dropped:0 overruns:0 frame:0
              TX packets:96 errors:0 dropped:0 overruns:0 carrier:0
              collisions:0 txqueuelen:0
              RX bytes:8164 (7.9 KiB) TX bytes:8164 (7.9 KiB)

venet0   Link encap:UNSPEC HWaddr 00-00-00-00-00-00-00-00-00-00-00-00-00-00-00-00
        UP BROADCAST POINTOPOINT RUNNING NOARP MTU:1500 Metric:1
        RX packets:248498 errors:0 dropped:0 overruns:0 frame:0

4294967295
unreachable default dev lo table unspec proto none metric -1 error -101 hoplimit 255
local ::1 via :: dev lo table local proto none metric 0 mtu 16436 advmss 16376 hoplimit
4294967295
local fe80::21c:f0ff:fe89:f510 via :: dev lo table local proto none metric 0 mtu 16436 advmss
16376 hoplimit 4294967295
ff00::/8 dev wlan0 table local metric 256 expires 20895427sec mtu 1500 advmss 1440 hoplimit
4294967295
unreachable default dev lo table unspec proto none metric -1 error -101 hoplimit 255
```

And, from within the VE in question.

```
root@etch-lab:/# ip rule list
-bash: ip: command not found
```

Obviously, without an internet connection I can't install ip on the VE.

I have no netfilter (iptables) rules in place on either the HN or the VE.

```
thorpe@oblivion ~ # sudo iptables -L
Chain INPUT (policy ACCEPT)
target    prot opt source          destination
```

```
Chain FORWARD (policy ACCEPT)
target    prot opt source          destination
```

```
Chain OUTPUT (policy ACCEPT)
target    prot opt source          destination
```

```
root@etch-lab:/# iptables -L
Chain INPUT (policy ACCEPT)
target    prot opt source          destination
```

```
Chain FORWARD (policy ACCEPT)
target    prot opt source          destination
```

```
Chain OUTPUT (policy ACCEPT)
```

target prot opt source destination

As you can probably see I have other VE's running on this same machine, all of which have this same issue. No internet connection.

Hi,

Quote:

Obviously, without an internet connection I can't install ip on the VE.

Why don't you download appropriate package on the HN and then move it into VE and install it there?

Or you can use "route" utility and "ifconfig" command inside VE.

Please show us the route table and ifconfig output from inside the VE.

Could you possibly show also "arp -n" on the HN?

And if it is possible what is the output of the "tcpdump" utility.

Try to ping something from inside the VE (ping x.x.x.x) and then show the output of "tcpdump" from HN and from VE.
