i have a problem with vzyum

```
/etc/sysconfig/vz-scripts//102.conf: line 16: USA: command not found
exec /usr/share/vzyum/bin/yum -c /vz/template/fedora-core/4/i386/config/yum.conf --installroot
/vz/root/102 --vps=102 install libssl.so
rpmdb: unable to initialize mutex: Invalid argument
rpmdb: PANIC: Invalid argument

```

i moved the vz to vz2/private/102/

how can i fix this?

Hi,

Quote:

i moved the vz to vz2/private/102/

What does it mean? Did you move the whole /vz partition or just moved /vz/private/102 files to

/vz2/private/102 and then change VE_PRIVATE parameter in /etc/vz/conf/102.conf file?
Could you possibly show 102.conf file?

Did you start then the VE and just issue on the HN (vzyum 102 instal libssl)?

Hi,

try to apply this patch

<http://git.openvz.org/?p=vzpkg;a=commit;h=491d4b09b09bb8a633442faff7dfa60ffcac976d>
does it help?

Hi,

please go there, then press "diff" - here is the patch.

then press "raw" save the patch.

then apply it to /usr/share/vzpkg/functions

(patch -p1 /usr/share/vzpkg/functions < PATCH_NAME)

P.S. If it's some problem with applying pay attention to the order of arches in this string

ARCHES="i386 x86_64 ia64 x86"

Everything should work.
