Subject: script to verify all beancounter settings
Posted by Zirafarafa on Tue, 17 Jun 2008 18:01:04 GMT

Hi

I found that vzcfgvalidate does not check all settings mentioned in the wiki, so I wrote a perl script to check all the recommended settings.

It is still preliminary, but I thought it may be useful to some people. Please let me know

Thanks, I have put it to http://download.openvz.org/contrib/utils/

I'd like to know what is missing from vzcfgvalidate/vzmemcheck?
