This VE used to start without problems, but now this happens:

```
Starting VE ...
VE is mounted
Adding IP address(es): 199.107.233.210 10.10.10.107
bash: line 61: 18219 Segmentation fault   ${CP} ${file} ${file}.$$
  ERROR: Can't copy file /etc/sysconfig/network
Setting CPU limit: 50
Setting CPU units: 1000
Configure meminfo: 401112
Set hostname: v1.selectacast.net
bash: line 304: 18222 Segmentation fault   ${CP} ${cfg} ${cfg}.$$
  ERROR: Can't copy file /etc/hosts
VE start in progress...
```

... and networking doesn't start. This is a CentOS 5 host with:

```
vzctl-lib-3.0.22-1
vzctl-3.0.22-1
ovzkernel-xen-2.6.18-53.1.19.el5.028stab053.14
vzquota-3.0.11-1
```

The template is the centos-5-i386-default image posted on
