Hi,

My name is cleber, of Brazil.

The OpenVZ can be installed in a server who already has cpanel functioning?

With the OpenVZ it is possible to create VPS with processor control, memory?

Which the charged price to make the installation of professional form?

(search is very useful thing  )
Check Hardware Compatibility List also for information, could OpenVZ be installed on your hardware:

Hi,

To twirl VPS with CPANEL, I go to need an additional license of cpanel?

Which the price that you snake to install the OPENVZ in my server?
