how can i create a VPS with unlimited resources?

server has 6gb ram, 740gb hdd, 2xcpu amd 6000+ 3000mhz

best regards in advance

thank you!

I have done it.

and i see only available 3GB of ram :-s

shouldnt they be 6?

```
# Configuration file generated by vzspli1 for 1 VEs
# on HN with total amount of physical mem [B]6049 Mb[/B]

Are you using x86 or x86_64? What does uname -a shows?

uname -a shows:

Linux server.domain.com 2.6.18-12-fza-686-bigmem #1 SMP Sun May 18 13:01:05 CEST 2008
i686 athlon i386 GNU/Linux

Try to increase privvmpages and kmemsize 2x.

But still, if you want > 4GB, x86_64 kernel is the best choice.

thank you!

That solved it

i have no idea why vzssplit only recognized 3GB, but that worked

Best regards
