Hi,

I installed the OpenVZ. When I go to create one vps, it stops in this screen... already waited 1 hour and he did not finish. What it is happening?

root@linux [/vz/private]# vzctl create 102
Creating VPS private area: /vz/private/102

Thanks!

Hi,

2522 (vzctl) /usr/sbin/vzctl /vz/private
vzctl create 102

2535 (vzquota) /usr/sbin/vzquota /vz/private
/usr/sbin/vzquota stat 102 -f

Please, do
strace -ff -o strace.out vzctl create 102
And send strace.out* here.
Thanks!

But what was the reason?
vzctl mustn't hang in any condition...
So if it hangs in "unusual" environment it's a BUG.
Can you describe how did you resolve the problem, please?

Thanks!
