Hello there,

I hope this project will be successful and prosperous.

The news is already posted on my virtualization blog:

<http://www.virtualization.info>

RegardsAlexander,

Thanks! And yes, we're also interested in any feedback from you regarding the software itself So this is the same technology used by SWSoft without the bells and whistles and only for linux?

Is that basically the intent or do you see it branching off into more of a new ideas typ
