Hi,

Each VPS is necessary to have an exclusive IP?

I have a dedicated server with CPANEL. I installed a VPS in another IP of the same server.
Necessary of an additional license pra each vps? What price?

Thanks!!!!

yes. but is some situations, when you have different services in VPS you can have private IPs and
use NAT in host system. I suppose this is not the case for CPanel.

OpenVZ is for free. CPanel licensing is not the question to be asked here

each vps must be have a license from cpanel, the very best price found is on this site :
https://interserver.net/plesk-directadmin-cpanel-webhostmana ger.html

only 15$ / month
