Hello,

How can remove an otemplate from openvz?

Thanks

Hi,

to answer your question you need to specify what do exactly you want to do.

If you want to remove otemplate cache please have a look inside `/vz/template/cache/` directory.
You can easily remove otemplate cache from that directory.

If you want to remove otemplate metadata. At first, make sure that you have something installed:

```
rpm -qa | grep vztmpl
```

Then you can remove appropriate package with "rpm -e" command.

Great ...
Thank you very much
