procps is very old and has a bug, that even is in commercial virtuozzo present, but only at x86-64 occurs a seg-fault.

problem 1: -fwritable-strings is no more supported in new gcc compilers.

diff to procps-2.0.11:

```
--- procps-2.0.11/Makefile_org 2008-08-04 21:39:51.000000000 +0200
+++ procps-2.0.11/Makefile 2008-08-04 21:39:56.000000000 +0200

+ $(strip $(CC) $(CFLAGS) -c $<)
```

skill.o: skill.c

```
$(strip $(CC) $(CFLAGS) -DSYSV -c $<)
```

problem 2:

description missing in sort, even at virtuozzo.

 };
```

with this patches it works also at x86-64 systems.
install src package:

rpm -i vzprocps-2.0.11-6.12.swsoft.src.rpm
patch files
and compile with:
rpmbuild -ba SPECS/vzprocps.spec

Thank you very much, Ingo, we'll fix the description (problem 2).

as for problem 1 - seems that newer procps packages have it already fixed.

Thank you for the report!
