Dear all

I would like to announce the release of WebVZ 2.0

Webvz is an open source control panel for OpenVZ.

Screenshots are available <http://webvz.sourceforge.net/screenshots.html>

to download <http://webvz.sourceforge.net/download.html>

Check the features on <http://webvz.sourceforge.net/features.html>

WebVZ is available on <http://github.com/shuaibzahda/webvz/tree> for developers

if you have any comment please send it to webvz.info@gmail.com

Enjoy

Thanks
Shuaib Zahda

Not working on Debian Etch, after installing i get the error when trying to log in:

Could not find table 'users'

```
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re  
cord/connection_adapters/sqlite3_adapter.rb:29:in `table_structure'  
/usr/lib/ruby/gems/1.8/gems/activesupport-2.1.0/lib/active_s upport/core_ext/object/misc.rb:28:in  
`returning'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re  
cord/connection_adapters/sqlite3_adapter.rb:28:in `table_structure'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re  
cord/connection_adapters/sqlite_adapter.rb:189:in `columns'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1145:in `columns'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1158:in `column_names'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1171:in  
`column_methods_hash'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1714:in  
`all_attributes_exists?'  
/usr/lib/ruby/gems/1.8/gems/activesupport-2.1.0/lib/active_s upport/inflector.rb:283:in `all?'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1714:in `each'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1714:in `all?'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1714:in  
`all_attributes_exists?'  
/usr/lib/ruby/gems/1.8/gems/activerecord-2.1.0/lib/active_re cord/base.rb:1613:in  
`method_missing'  
app/models/user.rb:13:in `authenticate'  
app/controllers/login_controller.rb:16:in `sign_in'
```

What could be causing this?

Regards,

Edward Tobia

What are the exact installation instructions for WebVZ 2.0 on Debian Etch?

I followed the instructions for WebVZ 1.5 on Debian Etch and changed the settings to reflect the 2.0 version but this fails to work correctly...

Regards,

Edward Tobia

Thanks for the feedback

WebVZ architecture did not change that much, so it is supposed to work fine on Debian and the like. This article is still relevant <http://www.howtoforge.com/managing-openvz-with-webvz-on-debian-etch>

I believe the problem that people face in debian and ubuntu is from ruby repositories

one of the users reported this solution and he claimed it is working fine

Dear Shuaib,
In my opinion the problem was in this repository:

```
#deb http://ameba.sc-uni.ktu.lt/debian/ etch main non-free contrib
#deb-src http://ameba.sc-uni.ktu.lt/debian/ etch main non-free contrib
```

When i changed it in that repository, everything installed ok.

```
deb http://ftp2.de.debian.org/debian/ etch main contrib non-free
deb-src http://ftp2.de.debian.org/debian/ etch main contrib non-free
```

Thank you very much for your feedback. Please do contact me for further assistance

I am looking for developers to code with me the WebVZ-MS, MS = Multiple Server

Hello,
I have just installed a new node and webvz.
But unfortunately, I have a problem with, probably, sqlite3 and vps_id table.

When I log into MyAddress:3000 and click to 'Containers'
I'm getting
'No such file or directory - /var/lib/vz/private/Warning:/etc/issue'

Seems like sqlite put 'warning' for vps_id.

I changed in app/controllers/application.rb
file = File.open("/var/lib/vz/private/#{vps_id}/etc/issue to VPS ID :
file = File.open("/var/lib/vz/private/100/etc/issue and it works.

In logs I see only query:

```
Processing ContainerController#list_vps (for 193.239.124.2 at 2009-08-17 11:55:45) [GET]
  Session ID: BAh7CzoMY3NyZl9pZCIINDhhYTA5ZmE2YWUwM2M2ZTIkM2UyMzU2MjBiZjAw
MjM2ZTIkM2UyMzU2MjBiZjAwMjM2ZTIkM2UyMzU2MjBiZjAwMjM2ZTIkM2UyMzU2MjBiZjAw
aXN0cmF0b3I6DnVzZXJfbmFtZSIKYWRtaW4iCmZsYXNoSUM6J0FjdGlvbknv
bnRyb2xsZXI6OkZsYXNoOjpGbGFzaEhhc2h7AAY6CkB1c2VkewA==--ddfc43
c937ddab9242ccf1a16ee5c45eb2bf0111
  Parameters: {"action"=>"list_vps", "controller"=>"container", "status"=>"all"}
  User Load (0.001333)  SELECT * FROM "users" WHERE ("users"."id" = 1) LIMIT 1
```

and probably this query gives 'Warning' and mess up everything.

How can I fix this?

Regards.

Can we use WebVZ 2.0 to control VPS of different servers ? Or we need to install webvz on each server ?
