Hi

I get this error when i install openVZ

```
Debian-40-etch-64-minimal:/var/lib/vz/template/cache# apt-get install
fzakernel-2.6.18-686-bigmem
Reading package lists... Done
Building dependency tree... Done
E: Couldn't find package fzakernel-2.6.18-686-bigmem
```

Why is that?

i followed the instructions from wiki

hi.

you have to compile the rioght fza.

that was my problem.

check instructions in <http://wiki.openvz.org/>

You just need to put correct sources for in /etc/apt-get/sources.list.

See: http://wiki.openvz.org/Installation_on_Debian
