if i use vzsplit to create 8 servers,
and i add a new server, i become:

```
[root@ronny html]# vzcalc 3
Resource  Current(%) Promised(%) Max(%)
Memory    0.16   105.00  105.00
```

?!

this is not normal, ok should be 15 - 20% but not 105 % ?!

thanks

Ronny

damn

i forgot vzcfgvalidate
now it works.)))))
