Hi,

I get this Message

```
:~# ip route add 192.168.177.n dev vzbr0  
Error: an inet prefix is expected rather than "192.168.177.n".
```

by following the instruction on

http://wiki.openvz.org/Veth#Configure_devices_in_the_CT0

Can anybody please help?

regards

Ralph
