When will the veth device be available?

Derrick

This is already available in new 2.6.16-026test014.4 kernel!
<http://openvz.org/news/updates/devel-kernel-026test014.4>

outstanding! I've just installed the kernel and the latest vzctl. When I do the --veth_add I am getting the following:

Processing veth devices

Warning: veth feature is not supported by kernel, skipped veth configure

WARNING: Settings were not saved and will be resetted to original values on next start (use --save flag)

How come?

Thank,
Derrick

sorry, thought I had loaded the module but hadn't. Nevermind.

Derrick
