hi ,

after restart my vz server . one of my vpses can ' t start .

[root@serverd608 ~]# vzctl start 130
Starting VE ...
vzquota : (error) can't lock quota file, some quota operations are performing for id 130
vzquota on failed [7]
[root@serverd608]# cd /vz/lock
[root@serverd608 lock]# ls
[root@serverd608 lock]# vzquota off 130
vzquota : (error) can't lock quota file, some quota operations are performing for id 130

please help me for solv it

Thankss

It means that some other instance of vzquota is doing something with this quota ID. You can run something like 'ps ax | grep vzquota' to see that other process.

In most cases the solution is to wait.
