Hello!

```
make install
for file in src; do \
    (cd $file && make -f Makefile install) \
done
make[1]: Entering directory `/vz/src/vzctl-3.0.10/src'
gcc -Wall -g2 -I ../include vzctl.o vzctl-actions.o modules.o enter.o -L. -Wl,-rpath=/usr/lib/vzctl/lib
-lld libvzctl.so.0.0.2 libvzctl-fs.so -lutil -o vzctl
install -d /etc/vz
install -d /usr/sbin
install -d /etc/vz/conf
install -d /usr/lib/vzctl/scripts/
install -d /usr/share/vzctl/scripts
install -d /etc/cron.d
install -d /etc/init.d
install -d /vz/lock
install -d /vz/dump
install -d /etc/logrotate.d
install -d /vz/template/cache
install -d /var/lib/vzctl/veip
install -d
install: too few arguments
Try `install --help' for more information.
make[1]: *** [inst-dirs] Error 1
make[1]: Leaving directory `/vz/src/vzctl-3.0.10/src'
make: *** [install] Error 2
```

Sorry for inconvenience and thanks for report.  
Please, just remove the string  
Quote:\$(INSTALL) -d \$(DESTDIR)\$(IPSTATEDIR)  
from ./src/Makefile in vzctl sources.

One more important thing!

In the new version of vzctl (3.0.10) file layout is changed:

`/etc/sysconfig/vz-scripts -> /etc/vz/conf`

`/etc/sysconfig/vz-scripts/dists -> /etc/vz/dists`

`/etc/sysconfig/vz -> /etc/vz/vz.conf`

So, to use old VPS's with new vzctl you must move directories appropriately!

In RPM release it's handled automatically!
