Hi everyone,

I have been trying to do virtual machine migration from node A to node B using command

```
vzmigrate --online -v username@<IP Address> veid
```

but am getting error permission denied...
Am i doing something wrong..
I even tried this..

```
vzmigrate --online -v <IP Address> veid
```

but the same error comes.

Can you please suggest any solution?

Thanks for your help
Neeraj

i Have also set up the passwordless login.. but i am still getting the same error....

My login name on the other machine is not root. is that creating a problem..

please help guys....

Hello,

Quote:

My login name on the other machine is not root. is that creating a problem..

Yes, it might have been a problem because you have to copy VEs private area to destination node and you have to be able to write to /vz partition (or where VEs' private areas locate).
