Subject: cannot remove openvz from Hypervm
Posted by sachin on Wed, 24 Dec 2008 23:44:03 GMT

Hello,

I have strange issue.

1) I did tried to remove one vps from hypervm but it take more than
  3 hours and no results found. It remains stucked.

So I did destroyed using "vzctl destory ID" its gone but I still can see the vm entry in hypervm
which I want to remove.

please let us know how can we this remove.

2) Also one of vps is not showing on server from "vlist" but we can see him from Hypervm. How
can we remove this VPS from Hypervm. It is also same condition which I mentioned in 1st issue. It
get stucked while removing from Hypervm.

Please update us so we will do it and this will be fixed.

Thanks in Advance.
Sachin.

Hello,

seems it is not OpenVZ but HyperVM specific question. You'd better ask this question on
HyperVM support forum.
