Hello guys

i have some question i hope to get answer

i have server 4 cpu AMD 880 dual core total 8 core
Ram 16 GB HDD 300x2 sas

i creat 3 vps with this configuration

Disk Quota >>>> 50000 MB
Burstable Memory >>>> 1024
Guaranteed Memory >>>> 512
Cpu Usage (%) 100/CPU >>>> 50
CPU UNITS (default 1000) >>>> 100
Number Of CPUS >>>> 1

=====

now the load in Node 3.65
the load in vps 3.50 that VE when have high load Node is upload to same value

is there some way to prevent that ??
i want if vps have load 100 or 200 etc the Node not effect with him

Thank you
