Hi,

Can you please tell me how to fix this problem !?

Warning: Unknown iptable module: ipt_nat_ftp, skipped

I think it should ip_nat_ftp not ipt_nat_ftp !

When I start my VPS I receive this error, Every time I use vzctl I receive this error !

I check /etc/sysconfig/iptables-config but there isnt any entry for ipt_nat_ftp !

Can you please tell me how to fix it !

Thank you

Solved sorry.

There was wrong entery in

/etc/vz/vz.conf

Thank you
