Hi

For some reason, Open-VZ is not starting automatically.

After rebooting the server, I always need to run this line

```
/etc/init.d/vz start
```

I am running:  
vzctl version 3.0.22-1dso1

On this system:  
Linux Debian-40-etch-64-minimal 2.6.18-12-fza-amd64 #1 SMP Sun May 18 09:57:TC 2008  
x86\_64 GNU/Linux

How can I make it restart automatically?

Best Regards in Advance

Hi,

as user root :

```
$ update-rc.d vz defaults
```

btw, please update your OpenVZ kernel to 2.6.18-14-fza-amd64 (028stab56.1)

Bye,  
Thorsten
