i installed openvz on QuadCore Q9300, but when i check at server information in WHM , say like this :

Processor #1 Vendor: GenuineIntel

Processor #1 Name: 06/17

Processor #1 speed: 2651.598 MHz

Processor #1 cache size: 3072 KB

how to fix it?

Hello,

what does it mean WHM?

We need to understand how WHM obtain that information to determine if it is OpenVZ or not
OpenVZ specific problem.

Hello,

it worth asking cpanel support first.
