I'm trying to install net-snmp in my ve running centos-5 and then I get this:

```
[root@srv /]# yum install net-snmp

Is this ok [y/N]: y

Downloading Packages:

Running rpm_check_debug

ERROR with rpm_check_debug vs depsolve:

Package initscripts needs ethtool >= 1.8-2, this is not available.

Package initscripts needs mingetty, this is not available.

Package initscripts needs module-init-tools, this is not available.

Complete!

Any ideas how this can be fixed?

I have the same problem. Running Centos 5, yum attempts to install net-snmp from centos-updates-cached and returns the same errors as OP. I will try to replicate this problem on another VE and report back.

Hello,

I encountered the same problem.

The fix was to install the dependencies in one sweep.

I've done:

```
yum install ethtool mingetty module-init-tools
```

This installed all the above packages and automatically removed "dummy-centos-5"

Afterwards, the installation of the net-snmp package worked.
