Hi!

Is OpenVZ Kernel slow?

When i'm running unixbench-4.1.0-wht-2 on the Host Machine with a non OpenVZ 2.6.27.18 Vanilla Kernel i get the following results:

INDEX VALUES			
TEST	BASELINE	RESULT	INDEX
Dhrystone 2 using register variables	376783.7	50530575.6	1341.1
Double-Precision Whetstone	83.1	1674.4	201.5
Execl Throughput	188.3	25659.0	1362.7
File Copy 1024 bufsize 2000 maxblocks	2672.0	615188.0	2302.4
File Copy 256 bufsize 500 maxblocks	1077.0	196511.0	1824.6
File Read 4096 bufsize 8000 maxblocks	15382.0	1422019.0	924.5
Pipe Throughput	111814.6	11214912.1	1003.0
Pipe-based Context Switching	15448.6	2299837.1	1488.7
Process Creation	569.3	64781.5	1137.9
Shell Scripts (8 concurrent)	44.8	4974.5	1110.4
System Call Overhead	114433.5	17398060.3	1520.4
	=====		
FINAL SCORE		1136.9	

When i install OpenVZ 2.6.18 or 2.6.26 Kernel and run WHT i get something like this:

INDEX VALUES			
TEST	BASELINE	RESULT	INDEX
Dhrystone 2 using register variables	376783.7	43674178.6	1159.1
Double-Precision Whetstone	83.1	1467.1	176.5
Execl Throughput	188.3	5866.4	311.5
File Copy 1024 bufsize 2000 maxblocks	2672.0	398961.0	1493.1
File Copy 256 bufsize 500 maxblocks	1077.0	207161.0	1923.5
File Read 4096 bufsize 8000 maxblocks	15382.0	1213218.0	788.7
Pipe Throughput	111814.6	10492852.7	938.4
Pipe-based Context Switching	15448.6	2225406.2	1440.5
Process Creation	569.3	13309.5	233.8
Shell Scripts (8 concurrent)	44.8	1571.6	350.8
System Call Overhead	114433.5	13993448.6	1222.8
	=====		
FINAL SCORE		699.4	

Stefan

Hello,

could you possibly try
OpenVZ 2.6.27 kernel
<http://download.openvz.org/kernel/branches/2.6.27/2.6.27-aiv-azovsky.1/>

and also 2.6.18 pure RHEL5 kernel

Hi!

I cannot test plain RHEL 5 Kernel cause i use Debian instead of Redhat.

Here are the Results from OpenVZ 2.6.27:

TEST	INDEX VALUES	BASELINE	RESULT	INDEX
Dhrystone 2 using register variables		376783.7	44178754.0	1172.5
Double-Precision Whetstone		83.1	1458.9	175.6
Execl Throughput		188.3	4718.0	250.6
File Copy 1024 bufsize 2000 maxblocks		2672.0	569144.0	2130.0
File Copy 256 bufsize 500 maxblocks		1077.0	178028.0	1653.0
File Read 4096 bufsize 8000 maxblocks		15382.0	1172482.0	762.2
Pipe Throughput		111814.6	9205265.5	823.3
Pipe-based Context Switching		15448.6	1949721.8	1262.1
Process Creation		569.3	10826.7	190.2
Shell Scripts (8 concurrent)		44.8	1274.3	284.4
System Call Overhead		114433.5	13813705.2	1207.1
		=====		
FINAL SCORE			654.2	

I'm using the provided default configs (only change processor Type to Intel Xeon).

Hello,

could you please specify your environment in detail.
As far as I understand this test is running on the HN. Am I right?

You're right - it is running in the HN. It is a plain Debian 4.0. No VPS installed at the moment. Only installed OpenVZ Kernel instead of the vanilla one.

Hello,

could you please check what kind of i/o schedulers are used
when vanilla kernel is booted and when OpenVZ is booted?
It may be obtained via "cat /sys/block/sdb/queue/scheduler".
The same interface can be used while changing that value.

"echo "SOMETHING" > /sys/block/sdb/queue/scheduler".

And some additional information (just in case):
from both kernels

- cat /proc/meminfo
 - cat /proc/mounts
 - tune2fs -l \$DEVICE
-
-

I've told about i/o schedulers but forgotten to ask you experiment with different schedulers.
Thank you.

Both are CFQ and i've also tried Anticipatory sched no difference. I'll now setup another machine - cause i needed the last one and will post results again with the additional informations you want.

Hi,

seems my previous suggestions were not quite correct.

Tests that are "failed" on OpenVZ kernel are: "ExecI Throughput" and "Process Creation".
An overhead during the process creation is normal because OpenVZ accounts memory. But the suspicious fact is SUCH big overhead!

Yeah that's right - i was wonderung why you wanted so much information about the filesystem and haddisks I've seen that the process results are really bad and i also know that OpenVZ has a overhead. But so much?? Any idea?

I cannot investigate this issue closely right now.
I think it's important not to lose your efforts and results.
So, what do you think about filing a bug?
<http://bugzilla.openvz.org/>
