Hi All,

We have a VE that disconnects for no apparent reason. Sometimes it's daily, sometimes it is every other day or two. The VE cannot be pinged but

vzctl enter <number>

works OK.

Any ideas how to approach this problem?

Slava

Please describe your network configuration:

- ip a l (from HN and from inside the VE)
 - ip rule list (from HN and from inside the VE)
 - ip r l (from HN and from inside the VE)
 - iptables -t filter -L; iptables -t nat -L; iptables -t mangle -L (from HN and from inside the VE)
 - arp -n (from HN)
-
