HI,

We have 1 node with following details

Primary drive = 250 Gb

df -h

rt	End	Blocks	Id	System
----	-----	--------	----	--------

/dev/sda1	*	1	127	1020096 83 Linux
-----------	---	---	-----	------------------

/dev/sda2		128	15425	122881185 83 Linux
-----------	--	-----	-------	--------------------

/dev/sda3		15426	16445	8193150 82 Linux swap / Solaris
-----------	--	-------	-------	---------------------------------

Empty drive 2 = Disk /dev/sdb: 250.0 GB, 250059350016 bytes

Empty drive 3 = Disk /dev/sdc: 250.0 GB, 250059350016 bytes

I would like to install Xen on it.

I will use this node for creating windows xen vps / linux xen vps

os install done and its blank so let me know how to start what partition shall I make?

Is it possible to use openvz too?

Hello,

This is Urgent.

Please let us know if any solution.

Thank you in advance.

Regards,

its_joy

It might be a good idea to go to the Xen forum for help with Xen. OpenVZ is not Xen. And good luck getting help from that crowd. That's a major unfriendly group of losers.

Jim.

Is there such a thing as write only access to this forum? I believe this guy has found it.
