Subject: mounting tmp - no space on device
Posted by devonblzx on Sun, 12 Apr 2009 19:05:54 GMT

Hello,

To secure the /tmp partition, we try to mount it with noexec,nosuid with:

mount -t tmpfs -o noexec,nosuid tmpfs /tmp/

However, we notice that after a while it will claim there is no space left on the device on the /tmp partition which causes issues with sessions and other web scripts.

Even after removing all the files in /tmp it will still claim there is no space.

Any ideas how to solve this?

Hello,

where did the problem happen, on the HN or inside the VE?
Quote:
we try to mount it with noexec,nosuid

Could you please check if these options caused the problem?
Were there any problems while these options were not used?

Even after removing all the files in /tmp it will still claim there is no space.

Could you please show

ls -l /proc/mounts
cat /proc/mounts
df -h
df -i

```
# df -h
Filesystem        Size  Used Avail Use% Mounted on
/dev/simfs        100G   41G   60G   41% /
tmpfs             3.9G  2.6M  3.9G    1% /tmp

# df -i
Filesystem        Inodes   IUsed    IFree IUse% Mounted on
/dev/simfs       4000000  311266  3688734    8% /
tmpfs            1011060     171  1010889    1% /tmp

# cat /proc/mounts
simfs / simfs rw 0 0
/proc /proc proc rw 0 0
/sys /sys sysfs rw 0 0
none /dev/pts devpts rw 0 0
tmpfs /tmp tmpfs rw,nosuid,noexec 0 0
```

Not sure about if it happens without nosuid and noexec yet.
